

Pongsakorn Poemkham

Frontend-Focused Full-Stack Developer

Pathum Thani, Thailand | 061-895-5968 | psocode2004@gmail.com

Portfolio: pskportfolio-six.vercel.app | GitHub: github.com/psocode2004

PROFESSIONAL SUMMARY

4th-year Computer Science student focused on Full-Stack Development, with hands-on experience building end-to-end web applications. Skilled in React, Next.js, TypeScript, Supabase, and PostgreSQL, with a well-rounded skill set spanning UI design, databases, authentication, real-time communication, and AI integration. Committed to building systems that prioritize accessibility, security, and performance to deliver production-ready software and an excellent user experience.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS

Backend: Supabase Auth, PostgreSQL, Row-Level Security (RLS), Node.js, REST API

Real-Time & AI: WebRTC, Pusher Channels, Google Gemini API, TensorFlow.js, COCO-SSD

Development & Tools: Git, GitHub, Pull Request, Testing, Performance Optimization, Vercel, Figma

SELECTED PROJECTS

Nyeta — Real-Time Assistive Platform for the Visually Impaired

Built a platform connecting visually impaired users with volunteers via live video calls, featuring AI and computer vision tools such as Gemini image description, document scanning, sign detection, and browser-based object detection — along with voice guidance, haptic feedback, and screen reader support.

Tech Stack: Next.js, React, Tailwind CSS, Native WebRTC, Pusher, Google Gemini, TensorFlow.js, COCO-SSD

Personal Portfolio — Interactive Developer Portfolio

Designed and built a responsive portfolio site with a modern Bento UI style, featuring standout GSAP animations such as a mouse-tracking spotlight effect, particle cards, and interactive project tabs. Implemented a custom smooth-scroll system from scratch using requestAnimationFrame for fluid page scrolling.

Tech Stack: React, JavaScript, Vite, GSAP, Custom CSS, Vercel

WhatPDF — Advanced PDF Processing Platform

Designed and built a platform for managing and interacting with PDF files using a Monorepo architecture (Turborepo) to cleanly separate the Web and Worker systems. Managed background job processing queues with BullMQ and improved system security through rate limiting alongside data caching via Upstash Redis.

Tech Stack: Next.js, TypeScript, Tailwind CSS, Turborepo, Upstash Redis, BullMQ, Cloudflare

EDUCATION

Bachelor of Science in Computer Science

Rajamangala University of Technology Suvarnabhumi, Phra Nakhon Si Ayutthaya Campus (Hantra)

2023 – Present | GPA: 3.22
